

Knowledge

- ❖ Animals are groups of organisms that need to consume food to survive.
- ❖ There are many different groups of animals. They have different structures, and they eat different types of foods.
- ❖ The structure of a variety of common animals varies such as; Mammals have hair/fur and give birth to live young, fish can breathe underwater using gills, birds have feathers, beaks and wings.
- ❖ Some eat other animals (carnivores), and others only eat vegetables (herbivores), and some like to eat both plants and meat (omnivores).

Prior Knowledge (EYFS)

- The Natural World- Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.

Key Question - How do animals survive?

Skills

- ❖ Observing closely, using simple equipment.
- ❖ Gathering and recording data to help in answering questions.

Key Vocabulary

- ❖ carnivores
- ❖ herbivores
- ❖ omnivores
- ❖ mammals
- ❖ reptiles
- ❖ fish
- ❖ birds
- ❖ amphibians
